Summary

I am a bilingual full-stack Javascript and Rails developer living in Tokyo.

I am attracted to Rails' ability to allow me to rapidly organize my code with the MVC framework and seamlessly integrate Javascript and CSS via bundling. More recently I am excited by the power and potential of ReactJS to quickly create snappy and scalable front-ends.

In my free time I am studying Japanese to aim for a JLPT N1 certification, studying web development via TheOdinProject, and working on personal projects.

Projects

Karaoke Song Organizer, [More Info](#)

- All-in-one karaoke app developed with **Ruby on Rails**. Via the **Genius API**, the **IP2Location API**, several **Google APIs**, and **web scraping**, users can search and save songs with full lyrics and karaoke store locations to a **PostgreSQL** database.
- Front-end was created using **HTML5**, vanilla **Javascript**, and **Tailwind**.

iPad Weather App [More Info](#)

- **Single-page** weather **application** emulating the display of an iPad built with **ReactJS**, **JSX**, and **CSS3**.
- By using the **IPGeolocation API** and **Open Weather Maps API** the app provides real-time local weather information.

Social Media Site, [More info](#)

- Social media site developed with **Ruby on Rails** and tested using **Minitest**. Authentication is handled by **Devise** and **Oauth2** allowing users to create new accounts or login via Facebook. Users can add friends, make posts, share pictures and update their profile.
- Front-end was created using **HTML5**, vanilla **Javascript**, and **Bulma**

Education

Bachelors of Arts in Business Administration - Business Economics,
Seattle University

2012 – 2015
Seattle, USA

Exchange Year, Sophia University

- One year study abroad program in the Faculty of Liberal Arts
